Organic principle

Organic Agriculture is a product system that sustains the health of soil, ecosystem and people. It relies on ecological processes, biodiversity and cycle adapted to local conditions rather than the use of inputs with adverse effects.

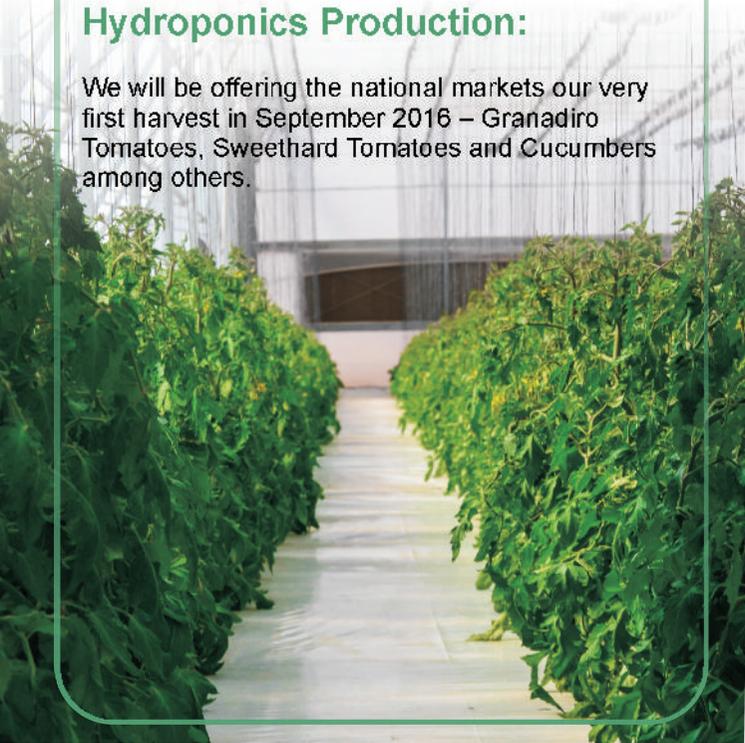

Organic agriculture combines tradition, innovation and science to benefit the environment and promote fair relationship and good quality of life for all involved-IFOAM.

We Produce:

Cabbage, Pumpkin (Bush Grey & Jamboree), Onions, Sweet Potatoes, Squash, Waltham Butternut, Lettuce, Carrots (Nantes), Green Mealies, Spinach, Green Peas, Radish, Garlic and other produce.

Hydroponics Production:

We will be offering the national markets our very first harvest in September 2016 – Granadino Tomatoes, Sweetheart Tomatoes and Cucumbers among others.

Our Differentiation!!

We have a proud history and we continue to strive for excellence. Our goal is to be a shining beacon of a rural cooperative that has achieved economic empowerment for its beneficiaries and food security through productive and sustainable organic farming. We are committed to reviving the rural economy by creating a sustainable agricultural development business; benefitting the broader community through employment, skills development and economic empowerment.

Among our achievements:

Fencing of 4 km boundary fence, creating jobs, reaching an agreement to market vegetables with Spar, Pick n Pay and Kimberley Tropical, the first in the district to produce organic vegetable, receiving positive EIA ROD from Department of Environment and Conservation (DENC), renovating 5 km water pipeline and electrifying the project and having Eskom connection. Having hosted His Excellency Hon President Jacob Zuma and then Minister of Agriculture Ms. Tina Joemat-Pettersson in 2013 shall forever be etched on our memories and cast itself as a hallmark signifying our pedigree.
